This above table provides updated 2010 auto reliability ratings and auto reliability rankings. It lists most of the convertibles, coupes, sedans, hatchbacks, wagons, minivans, sport-utility vehicles (SUVs and XUVs), and pickup trucks sold in the U.S. It expresses the auto reliability ratings and auto reliability rankings, and makes available auto reliability comparisons and auto reliability contrasts, using the Auto Reliability Grade Point Average, or Auto Reliability GPA. This auto reliability index is valuable as it is an easy-to-understand, but detailed, auto reliability measure, and is familiar to many having attended secondary school and nearly all who have received some post-secondary education. The page also employs Auto Reliability Grades as a reliability index. This measure of auto reliability differences, although less detailed, is valuable as it is familiar to all persons having attended primary school. The updated Auto Reliability GPA is an automobile reliability statistic that is obtained from Consumer Reports' auto reliability survey data summarized in the reliability tables of (1) Consumer Reports: New Car Buying Guide: 2010, (2) Consumer Reports: Used Car Buying Guide: 2010, and (3) the April 2010 issue of the Consumer Reports magazine.

Letter grades for reliability are determined thusly: A if the Reliability GPA is 3.50 to 4.00, B if the Reliability GPA is 2.50 to 3.49, C if the Reliability GPA is 1.50 to 2.49, D if the Reliability GPA is 0.50 to 1.49, and F if the Reliability GPA < 0.50.

The method of computation of the GPAs is probably familiar to nearly every college, technical school, and high school student. A Grade Point of 4.00 (that is, an A) is given to a Consumer Reports "Much Better Than Average" rating, a GP of 3.00 (that is, a B) is given to a CR "Better Than Average" rating, a GP of 2.00 (that is, a C) to an "Average" rating, a GP of 1.00 (that is, a D) to a "Worse Than Average" rating, and a GP of 0.00 (that is, an F) to a "Much Worse Than Average" rating. A Grade Point Average (GPA) is an average of the Grade Points and is computed using Microsoft's Average(a:b,[c:d],...) function.

Note that the Average GPA is the average of the four 4-year GPAs.
